The quick and easy solution for connecting a PCI Express® Card using the power of Thunderbolt2™

Power, Performance, Portability: Enhance the power of your laptop with the Magma ExpressBox 1T and harness lightning-fast throughput up to 20 Gbps over a single cable via Thunderbolt-2 technology. ExpressBox 1T enables serious professionals to use specialty PCIe cards with any Thunderbolt-equipped computer, so that you can achieve high performance wherever your work takes you. Add a PCIe card to ExpressBox 1T and your computer turns into a powerful workstation capable of HD video capture and editing, media transcoding, audio processing, data processing, or high-speed storage and networks. The ExpressBox 1T offers the largest card length slot (7.75") among all 1-slot Thunderbolt chassis on the market, giving your Mac the power to achieve maximum performance with any compatible half-length PCIe card. Whether your mission involves professional video capture, audio interface, SAS & SATA HBA, 8Gb Fibre Channel, 10 Gigabit Ethernet, or a RAID controller card, Magma's family of Thunderbolt products provide the perfect outsidethe-box solution for your project.

The Most User-Friendly Expansion Chassis Ever: The ExpressBox 1T offers quick and easy installation for its users. Open the chassis with two thumbscrews, no tools required. The card carriage slides right out, providing quick access to the PCIe slot and easy installation. We designed our products with optimal ease of access so that you can be up and running in seconds.

Designed with Studios in Mind: Need a quiet work environment for your recording or mixing projects? ExpressBox 1T features quiet ventilated cooling with two user-controlled fans, allowing you to adjust fan

speed and noise level based on your working environment needs.

Superior Engineering. Rock Solid Innovation: ExpressBox 1T protects your valuable PCI Express cards in a heavy duty chassis while providing lightweight portability, so you can take high performance anywhere your work requires. The extruded aluminum shell provides a strong, protective housing while also removing heat from the cards inside. The sleek design of the ExpressBox 1T matches elegantly with your Thunderbolt equipped Mac, ensuring that you stay classy with a Magma chassis.

Magma's expertise in developing products that extend PCI and PCI Express signals over a cable and outside the computer provides a reliable foundation for producing rock solid products that offer the highest performance even in the most demanding configurations

Application

- HighSpeed daten streaming
- Video Production
- Music Production
- Audio Editing
- Video Effects
- Video Capture.
