PCI Express to PCI Express expansion with 3 PCIe x8 Gen-3 slots

Order-No.: WM1-092-300 Series/Model: ExpressBox 3200

PCI Express to PCI Express Expansion with PCIe 3 x8 Gen-3 slots

Main Product Features

- **3 Slots x8 Gen-3**
- **Easy Plug and Play installation**
- **Use any combination of x1, x4, x8 and x16 PCIe cards**
- **Magma's exclusive quiet cooling control**
- **Auxiliary power cables**
- **Variable speed thermistor control option (or full speed)**
- **Fanless 520-watt power supply**

Benefits

- **Attach up to (3) PCIe cards to any computer**
- **Speeds up to 8 GT/s (PCIe x8 Gen 3)**
- **Extension of PCI Express signals outside the computer**
- **Daisy-chain or end-point device**

Connect high performance peripherals at Gen 3 speed. The ExpressBox 3200 is our latest Gen 3 marvel - precision engineered to the same exacting standards demanded by our defense and aerospace customers. The EB3200 is built for blistering speed and features three (3) full-length, full-height PCIe slots and flexibility with two customer configurable 5.25" expansion bays. The rack-mountable aluminum chassis is designed for integrated removable storage expansion, a 520-watt fanless power supply, auxiliary power, and features Magma's exclusive quiet cooling technology.

ExpressBox 3200 is compatible with a series of operating systems, including MacOS, Windows, Linux, and Solaris. Multiply your capacity by adding a host of specialty any computer with an available PCIe slot, and achieve amazing performance in any workstation configuration. ExpressBox 3200's patented performance optimizing backplane seamlessly integrates PCIe expansion to ensure that all devices installed in the system operate with the maximum possible speed. With Gen 3 PCIe cabling and scorching-fast card-tocard communication, ExpressBox 3200 is the only choice for serious computing environments.

Applications

- HighSpeed data streaming
- Telecommunications
- Military applications
- Server and computer system extensions
- Data collection
- Measuring technology
- Medical technology

- Video editing
- Music production
- Industrial automation and control systems
